

The Box – the world’s first DAB-radio equipped with only 5 buttons...

By opening the lid, the radio seeks available channels and you will be supported with great sound immediately.

Stream music from any Bluetooth device. Set up is made simple by NFC (Near Field Communication).

The Box fits in everywhere and the built-in rechargeable battery keeps the Box playing for approx. 6 hours. It is very suitable for a kitchen, for example, as the silk matt surface is easy to clean with a damp cloth.

A radio that does not look like a radio...
