

# The Transistor – DAB+ transistor radio in an elegant and minimalist design with maximum sound experience...

The history of the transistor radio goes back more than 60 years but it is still alive and well. We got inspired by this history and have combined The Transistor with a modern Scandinavian design, however classic, added the newest technology and up-dated the entire control system so that the radio is easily and quickly operated by use of only 6 buttons.

The Transistor has Bluetooth and NFC (Near Field Communication). The built-in Battery guarantees entertainment anywhere up to approx. 6 hours.

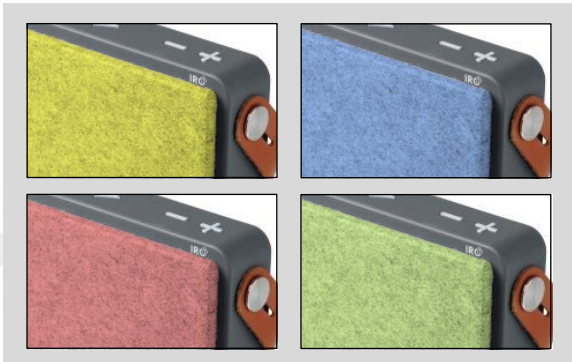

What more to say – Experience the sound!

Stream your favourite music to the radio via Bluetooth...
